## 👤 PROFILE

Results-driven QA Engineer with 1.2 years of development experience and expertise in manual and automation testing. Skilled in Selenium, Cypress, Postman, JMeter, SQL, and RESTful APIs. Strong foundation in Java, C#, and .NET with proven problem-solving and analytical abilities.

## 📁 PROFESSIONAL EXPERIENCE

### Software Engineer - Microsoft

08/2022 – 11/2023 | Pune, India

Newvision Softcom & Consultancy Private Ltd.

- Developed and maintained RESTful APIs using **ASP.NET Core Web API** and **C#**
- Optimized database queries and stored procedures using **MSSQL** and **MySQL**
- Participated in **unit testing**, bug fixing, and code reviews to maintain code quality

## 🧠 TECHNICAL SKILLS

- |              |                              |                    |                      |
|--------------|------------------------------|--------------------|----------------------|
| • Java       | • Manual Testing             | • ASP.NET          | • SQL Server,        |
| • JavaScript | • Automation                 | • ADO.NET          | • MySQL              |
| • C#         | • Testing(Cypress, Selenium) | • Entity Framework | • Store Procedure    |
| • HTML       | • API Testing                | • LINQ             | • Problem-solving    |
| • CSS        | • Test Case Design           |                    | • Team Collaboration |
|              |                              |                    | • Fast Learner       |

## 🎓 EDUCATION

### Software Development Engineer in Test

03/2025 – Present | Bengaluru, India

Masai School, Bengaluru

### B-Tech in Mechanical Engineering (71.3%)

06/2022 | Solapur, India

Brahmdevdada Mane Institute of Technology, Solapur

### Diploma in Mechanical Engineering (62.3%)

06/2019 | Solapur, India

A.G. Patil Polytechnic Institute, Solapur

## 📁 EXPERIENCED PROJECTS

### Deloitte Project

02/2023 – 07/2023

Tech Stack: C#, ASP.NET Core Web API, LINQ, SQL Server

- Developed the "Deloitte Confidential Information Protection Platform (DCIPP)" with secure API endpoints.
- Designed and optimized database queries to handle large datasets efficiently.
- Wrote unit tests and fixed bugs to improve reliability.

### OneNvOps

10/2022 – 04/2023

Tech Stack: C#, ASP.NET Core Web API, MSSQL

- Built REST APIs for core business modules and ensured smooth integration.
- Conducted unit testing and database maintenance to improve performance.
- Collaborated with team to enhance code quality through reviews.

### Personal Projects

Tech Stack: Selenium, Cypress, Postman, JMeter, Burp Suite

- Hands-on experience with **10+ academic and real-time projects** covering automation and testing.
- Automated end-to-end test scenarios using Selenium and Cypress.
- Performed API Testing with Postman and load testing with JMeter.
- Conducted security testing using Burp Suite for vulnerability detection.

## 📜 CERTIFICATES

**Microsoft Certified:** Azure Fundamentals (AZ-900) Fundamental

**Udemy Certification:** ASP.NET Core Web API Development
